**PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS.**

**Footnotes to Composite Performance and Related Statistics:**

- The term "Drawdown" means the Net Loss experienced by the account over a specified period. Net Loss for purposes of this capsule means the negative number resulting from adding, for a given period: 1) all realized gains and losses; plus 2) the change in value of open positions during the month; plus 3) interest earned in any account; minus 4) all commissions, transaction and other expenses incurred during the period.
- "Largest Monthly Drawdown" represents the largest Drawdown experienced by the Program reflected in this capsule in any calendar month, expressed as a percentage of the account's beginning value.
- "Largest Peak-to-Valley Drawdown" represents the largest Drawdown experienced by the Program reflected in this capsule during any period, expressed as a percentage return.
- Returns shown for September 2011 reflect a partial month of trading.
- Performance results prior to January 1, 2015 reflect application of the Advisor's 2% management fee and 20% incentive fee applied on a pro forma basis to all accounts.
- Prior to October 1, 2014, the monthly rate of return was computed using the "Only Accounts Traded" method, pursuant to which the performance of accounts that are open for only part of a month, or accounts that materially change their nominal value during a month, is not included in the composite performance.
- Wharton Capital Management, LLC acts as a sub-advisor to a third-party CTA's qualified eligible person customers. The performance of those accounts, and their nominal values, are not presented in this capsule.
- As of October 1, 2014, the monthly rate of return is computed using the daily compounded method so that daily changes in nominal value are incorporated into the composite program return. For return calculation purposes, additions are effective at the start of the day and withdrawals are effective at the end of the day.
